Hard Skills

- Java 8+ | Spring | Quarkus | JSF
- REST APIs | Microservices
- JPA | Hibernate | Relational Databases
- Kafka
- Docker | CI/CD | Jenkins
- Automated Tests | Junit | TDD
- TypeScript | JavaScript | Angular
- AWS (SQS, S3, DynamoDB)
- Git | Scrum

EDUCATION

MBA in Full Cycle Architecture (In Progress)
Estácio University – 2024–2026

Graduate Degree in Systems Analysis and Development
Estácio University – 2015

COURSES

- DevOps Ninja: Docker, Kubernetes e Rancher - **Udemy**
- Web Development with Quarkus - **Udemy**
- Angular 9 + Spring Boot 2.2: Fullstack - **Udemy**
- TDD - Automated Testing with Java – **TriadWorks**
- Java Programmer Training – **Evolution Institute**

Languages

- **Portuguese** – BR Native
- **English** – Intermediate (Professional Working Proficiency)

Gabriel Veras

Software Engineer

Executive Summary

Senior Software Engineer with 8+ years of experience in Java backend development, specializing in Spring Boot, Quarkus, microservices, and enterprise-grade systems. Strong background in building scalable APIs, integrating legacy platforms, and working with relational databases and messaging systems. Experienced in agile environments, CI/CD pipelines, and delivering reliable solutions for mission-critical systems.

Work Experience

- Senior Software Engineer** | Stefanini Brasil, Brazil

2024/02

 - Designed and maintained scalable Java backend APIs using Spring Boot for enterprise systems.
 - Developed RESTful services and integrated legacy platforms to ensure reliability and performance.
 - Applied TDD and automated testing with JUnit.
 - Collaborated with QA teams during SIT and UAT cycles.
- Senior Software Engineer** | K2 Partnering, Brazil

2023/10 – 2024/03

 - Developed and maintained backend APIs using Quarkus in a microservices architecture.
 - Integrated AWS services such as SQS, DynamoDB, and S3.
 - Implemented TDD and automated tests using JUnit.
 - Built containerized development environments using Docker.
 - Managed messaging workflows and performed monitoring and troubleshooting.
 - Participated in code reviews and agile ceremonies using Scrum.
- Senior Software Engineer** | CooperSystem, Brasília-BR

2021/12 – 2023/10

 - Developed enterprise-grade Java backend systems.
 - Applied automated testing with JUnit to ensure code quality.
 - Managed CI/CD pipelines using Jenkins and Rancher.
 - Worked in agile environments using Scrum.
 - Used JPA and Hibernate for data persistence.
- Software Engineer** | Capgemini – Brazil

2021/06 – 2021/12

 - Developed backend APIs consumed by a React Native frontend.
 - Implemented automated tests with JUnit.
 - Integrated systems with Oracle databases.
 - Supported CI/CD pipelines using Jenkins and Argo CD.
- Software Engineer** | Multiple Companies (2017–2021)
